## **3. Aspectos operacionales y metodológicos**

### **3.1 Universo**

El universo censal abarca todo el territorio de la República Dominicana y sus aguas jurisdiccionales, incluyendo todos los residentes habituales del país, así como todas las viviendas y hogares localizados en el territorio nacional.

### **3.2 Tipo de censo**

El IX Censo Nacional de Población y Vivienda 2010 constituyó un censo de derecho o de jure, es decir, se empadronó a todas las personas residentes habituales en los hogares, independientemente del lugar donde se encontraran en el momento del empadronamiento.

### **3.3 Período de levantamiento**

El levantamiento de la información del IX Censo Nacional de Población y Vivienda 2010 se desarrolló durante siete días, del 1 al 7 de diciembre de 2010. Sin embargo, dos días previos al empadronamiento se realizó el recorrido de reconocimiento de las áreas, y durante los dos días posteriores al levantamiento se desarrolló la encuesta de cobertura y calidad censal.

### **3.4 Período de referencia**

El período de referencia de la información censal, a nivel general, es la mitad del período de empadronamiento. Sin embargo, se utilizaron otros períodos de referencia para temas específicos. Para las características económicas se tomó como período de referencia la semana anterior al día de inicio del empadronamiento. Con el propósito de obtener datos que sirvan de plataforma para el estudio de la migración reciente, se captó información acerca del lugar de residencia habitual cinco años antes de la fecha del levantamiento, es decir, noviembre del 2005. A su vez, los datos sobre mortalidad se refieren al período comprendido entre 1.º de enero del 2009 y el 31 de diciembre de ese mismo año.

### **3.5 Método de recolección**

La recolección de datos se realizó mediante entrevistas directas, visitando cada uno de los hogares existentes en las viviendas ocupadas o locales utilizados como vivienda. Las entrevistas fueron conducidas por Empadronadores bien capacitados, quienes debían de hacer el esfuerzo por entrevistar a los miembros del hogar, y en caso de aquellos miembros ausentes y de los que no estaban aptos para ofrecer las informaciones, se procuró un informante adecuado para que ofrecieran las informaciones de los miembros habituales del hogar. Para fines del censo se consideró como informante adecuado a toda persona de 15 años o más de edad, que conociera las informaciones solicitadas en la boleta censal para cada uno de los miembros del hogar.

### 3.6 Residente habitual

Es la persona que reside habitualmente en la vivienda, esto es, que duerme ahí, prepara sus alimentos, come y se protege del ambiente, y por ello lo reconoce como su lugar de residencia. Incluye al personal doméstico y a sus familiares si duermen en la vivienda y a las personas que en el momento de la entrevista están presentes en la vivienda y no tienen otro lugar fijo donde vivir; así como aquellas personas o grupos de personas que se alojan en lugares o espacios que no constituyen una vivienda propiamente.

### 3.7 Unidades de empadronamiento

Al igual que en los censos anteriores, las unidades de empadronamiento consideradas en el IX Censo Nacional de Población y Vivienda 2010 son: la persona, el hogar y la vivienda. Las personas son todos los residentes habituales de los hogares censales. A su vez, se consideró el hogar como una unidad de cohabitación y alimentación, formada por una sola persona o varias con o sin lazos familiares que, a su vez, tienen la vivienda como unidad física de interacción. En términos operativos, para la identificación de hogares dentro de la vivienda, se utilizó como criterio el alimentarse de las mismas comidas o compartir los demás gastos comunes.

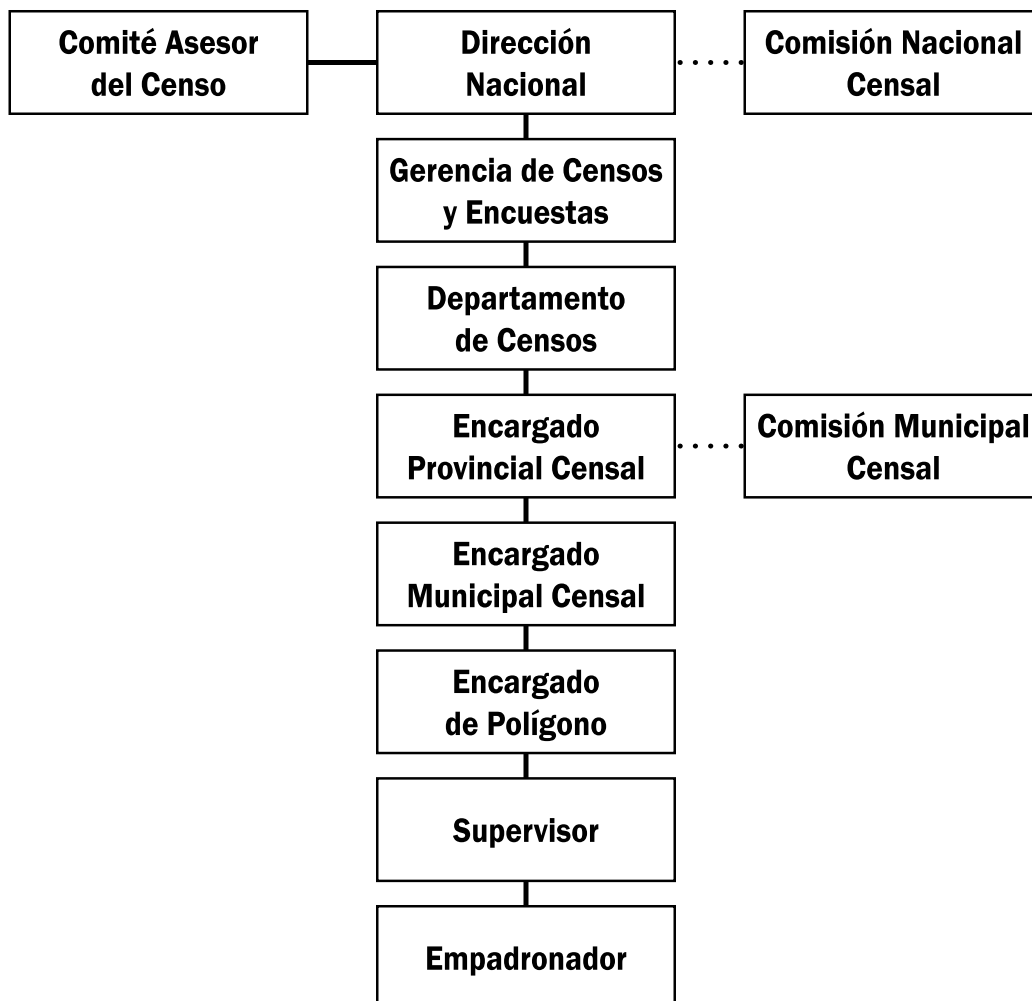

Para los propósitos censales se consideró como vivienda todo local con entrada independiente y delimitado por paredes, muros o cercas, y cubierto por un techo, convertido o dispuesto para el alojamiento permanente o temporal de personas con vínculo familiar o no. También se empadronó como vivienda un negocio, tienda o taller dentro del cual se ha separado una parte para residir, así como cualquier local, fijo o móvil, que al momento del censo estuviese ocupado como lugar de alojamiento permanente.

### 3.8 Estructura operativa censal

La estructura operativa del IX Censo Nacional de Población y Vivienda 2010 muestra los niveles jerárquicos, formas de articulación y canales de comunicación que se establecieron para el logro de los objetivos. El Director de la Oficina Nacional de Estadística, como máxima autoridad de ese organismo, tuvo la responsabilidad de dar los lineamientos de política para la organización, planificación, desarrollo y control de la ejecución censal. Se hizo ayudar del Comité de Apoyo Interno al Censo, y posteriormente por el Comité Asesor y de Control de Gestión del Censo, conformado con el objetivo de dar recomendaciones a la Dirección Nacional acerca de diversos aspectos relacionados con el censo. De igual manera, recibió el respaldo de la Comisión Nacional Censal. La Gerencia de Censos y Encuestas tuvo a su cargo la conducción técnica normativa del IX Censo Nacional de Población y Vivienda 2010.

Para facilitar las operaciones censales se crearon 48 provincias censales y 352 municipios censales. Esta estructura operativa permitió que se hiciera una distribución de la carga de trabajo, relativamente equitativa, para cada una de las personas que tuvo la responsabilidad de conducir el censo en el territorio.
